

La Chapelle

HERMITAGE

2021

100% SYRAH

La Chapelle, whose vines have been planted on the Hermitage hillside for centuries, has built its reputation on the excellence of its wine and its legendary setting.

For a legend to be born,
you need a knight!

It was in 1224 that the knight Henri-Gaspard de Sterimberg, back from the Crusades, established himself as a hermit on the hill and built a small chapel. He planted a few Syrah vines there, a cross between a grape variety from the Ardèche, Dureza, and a Savoyard variety, Mondeuse blanche. It is only here that Syrah finds its most natural terroir of expression and can enable wines to achieve such longevity.

Since 1919, on these steep, stony hillsides where only the hand of man can intervene, the Jaboulet family and then the Frey family have succeeded one another in cultivating the vines of this now legendary cuvée, La Chapelle Hermitage.

TASTING NOTE

A classic vintage, this wine has a lively nose of shivering black fruit and peppery flowers. A sumptuous promise of depth on the palate, with something vibrant and refined about it. The aromatic complexity gives a finish that is both intense and full of vitality, with notes of amarellé and violet. — Tasted in June 2023

SITUATION / TERROIR

Soil geology: La Chapelle is a blend of the great terroirs of western Hermitage. The granitic part, at Les Bessards and Varogne, gives rise to soils where the bedrock emerges in many places. The pebble soils on the highest terraces, such as the Méal and Rocoules hillsides, are the oldest.

Planting year of vines: *From 1955 to 1994*

Average exposure: *South to South-West*

Average slope: *50 %*

Vineyard management: *Goblet on stake*

Average altitude: *200 m*

Vine density: *6000 to 9000 vines/ha*

WEATHER CONDITIONS

The autumn of 2020 was not very wet, except in December, which helped to balance the water deficit. After a relatively mild winter, the spring was early and vegetation started to grow rapidly, 15 days ahead of schedule. However, vegetative development slowed down very quickly with the drop in temperature. Episodes of black frost were recorded during the nights of April 7 to 9 with temperatures between -1°C and -6°C. Spring was cool and rainfall was abundant in May. Flowering took place rapidly and in good conditions around June 7. The summer was also very wet with temperatures below normal.

— **Harvest date:** 26 September to 7 October

VINIFICATION / AGEING

The grapes, harvested by hand and placed in small 12 kg crates, are meticulously sorted by hand on several sorting tables (*grape sorting followed by manual or optical berry sorting*).

Alcoholic fermentation lasts around 10 days, between 22 and 28°C, with yeasts indigenous to the Northern Rhône, during which we gently extract the phenolic compounds from the grapes by punching down and pumping over.

Post-fermentation maceration lasts around 2 weeks to allow the components of the wine to infuse gradually.

The wine is then matured for 12 months in French oak barrels, 15% of which are new, and in natural cement concrete eggs with malolactic fermentation.

MINDFUL VITICULTURE

Adopting a resilient approach is an obvious priority in order to preserve the unique heritage of the Domaine de La Chapelle Hermitage terroir and ensure the quality of its wines endures.

We see viticulture as an ongoing process of research, not a one-size-fits-all approach. To achieve this perfect harmony, we have adopted a regenerative approach that involves a deep understanding of the vine's nature and links it to its overall environment.

(certified organic since 2016 and cultivated according to biodynamic principles since 2018)
